

APL constant current power supply

LS-APL series · Light controllers · 2 models

The LS-HAPL515-2T constant-current controller provides stable, controllable power for 5 V spot lights; brightness is adjusted steplessly by voltage control and each channel can output up to 680 mA. A stable, convenient, fast, high-response controller for industrial lighting.

Features

- Stepless knob for precise brightness adjustment
- Two channels controlled independently for precise control
- 0-680 mA constant current for spot lights

Common specifications

Input voltage	AC100-240V 50/60Hz
Output voltage	5V
Control	Stepless knob
Trigger input	No
Front panel	Stepless knobs, power switch
Rear panel	Power input, light outputs, ground terminal

Models

Model	Channel / output	Total output current	Channels
LS-HAPL515-2T	C2 O2 (2 channels, 2 outputs)	1.36A	2
LS-HAPL515-4T	C4 O2 (printed "4 channels, 2 outputs")	2.72A	4

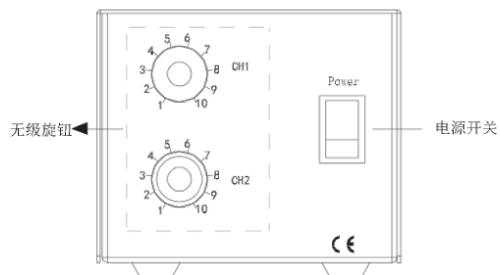

More values per model (Single channel current, Control (perform)) are on each product page.
