

Single channel analog LED light controller

LS-NTC-A series · Light controllers · 2 models

Constant current single channel analog controller for high precision and intensity control of machine vision LED lights; external trigger pulse sync mode and ON mode; precision potentiometer allows high precision intensity adjustment.

Features

- Constant current single channel analog control
- External trigger pulse sync mode and ON mode
- Precision potentiometer allows high precision intensity adjustment

Applications

- Machine vision LED light control

Models

Model	Max. output current of each channel
LS-NTC-C000505A	0~5mA/5V
LS-NTC-C1024A	0~1A/24V

More values per model (Power supply, Max. output voltage of each channel, Channels, Intensity adjustment, External trigger mode, External trigger voltage, Operating environment, Dimensions (mm), Installation mode, Weight, Control) are on each product page.
