

Portable optical test stand

LS-PTF series · Camera stands · 2 models

Small, light portable optical test platform developed for machine vision engineers to carry and demonstrate vision inspection at customer sites. It has two height-adjustable stainless steel columns, one for the light and one for the industrial camera; each has three degrees of freedom (any height adjustment and any movement in the plane), and the clamps fit almost every type of industrial camera and light.

Features

- Clean, simple appearance
- Camera and light can be moved up and down or rotated freely
- Easy to install and operate
- Wide range of use
- Light weight, easy to carry
- Highly adaptable (fits different industrial cameras and lights)
- Aluminium alloy, sturdy and durable

Applications

- Carrying to customer sites to demonstrate vision inspection projects
